

PFRIMMER DEEP MUSCLE THERAPY®

90 min treatment \$95

Discover the Benefits of Pfrimmer Deep Muscle Therapy®

Conditions to benefit:

ALS (Lou Gehrig's Disease)
Brain Injury
Bell's Palsy
Cerebral Palsy
Fibrositis & Fibromyalgia Syndrome
Lupus
Memory Loss
Multiple Sclerosis
Neuralgia
Muscular Dystrophy
Neuritis
Parkinson's
Polio
Scoliosis
Strokes
TMJ
Arthritis
Carpal Tunnel Syndrome
Headaches
Heart Problems
Joint & Muscle Pain
Neck & Back Pain
Occupational Injuries
Paralysis
Poor Circulation
Sciatic Pain
Sports Injuries
Tendinitis, Bursitis
Whiplash

Pfrimmer Deep Muscle Therapy® is designed to cause corrective changes to the damaged or adherent muscles and the adjacent soft tissues. The improved circulation that results causes changes on the cellular level, not only to the muscle involved, but also to any soft tissue that may have been affected by the impaired circulation. Where muscles have become "dry," Pfrimmer Deep Muscle Therapy brings lymphatic fluid toward the muscle cell. The lymphatic fluid acts as the liquid medium required for osmosis and cellular exchange on the capillary level.

Pfrimmer Deep Muscle Therapy® relieves entrapment of nerves, and it also aids in moving out toxins and congestion that may have accumulated in damaged muscle and soft tissue, thereby reducing edema and inflammation, as well as reducing pain. It promotes detoxification on a cellular level, thus improving cellular function. It softens hard fibrous muscle which restricts joint range of motion, thereby "throwing off" the body's proper structural alignment.

Pfrimmer Deep Muscle Therapy® provides a dramatic form of passive exercise for those who have been injured or ill. Combining PDMT with traditional treatments of specific conditions or diseases offers an added edge that can speed recovery and promote maximum improvement where traditional treatments leave off.
